

Oke Vodka

ABAC Holland introduces a new drink, Oke Vodka, a saffron infused drink with superior qualities.

This great new drink is produced and bottled by one of Holland's most prestigious distillers, the Melchers Group, known for its innovative product line combined with excellence in quality for 175 years.

The characteristic flavour, colour and beneficial effects come from the infusion of high quality saffron. Saffron is known for its many beneficial effects on human health.

ABAC Holland provides the saffron that makes this vodka unique. ABAC's owner Marco Minnes has over two decades of experience in saffron bulb and saffron flower production. He works with saffron growers in many countries such as France, Spain, Italy, Turkey, Morocco, Iran, Afghanistan and provides training and advice. He grows and procures the best product from various parts of the world to infuse the Oke Vodka line that he developed last year with the highest quality ingredients.

Oke Vodka is a drink with character that can be enjoyed straight, with ice but goes equally well in cocktails.
